

## AMENDMENTS TO THE CLAIMS

**This listing of claims will replace all prior versions and listings of claims in the application:**

### LISTING OF CLAIMS:

**1.-8. (canceled).**

**9. (currently amended):** An organic light emitting device comprising at least one light emitting layer between an anode and a cathode, wherein the light emitting layer adjacent to the anode is an anode buffer layer comprising the a polymer comprising a monomer unit represented by the following formula (1):

wherein  $M^+$  represents a hydrogen ion, an alkali metal ion, or a quaternary ammonium ion,  $k$  represents 1 or 2, and a hydrogen atom in the aromatic ring may be replaced by a substituent, and/or a monomer unit represented by the following formula (2):

wherein k represents 1 or 2, +k represents a positive charge number, and a hydrogen atom in the aromatic ring may be replaced by a substituent.~~polymer for the anode buffer layer according to claim 1.~~

**10. (original):** The organic light emitting device according to claim 9, wherein the light emitting layer comprises a fluorescent polymer material.

**11. (original):** The organic light emitting device according to claim 9, wherein the light emitting layer comprises a phosphorescent polymer material.

**12. (new):** The organic light emitting device according to claim 9, wherein the polymer has a weight average molecular weight of 1,000 to 200,000.

**13. (new):** The organic light emitting device according to claim 9, wherein the polymer is a polymer of 5-sulfoisothianaphthene-1,3-diyl, a random copolymer containing 5-sulfoisothianaphthene-1,3-diyl in an amount of 80 % by mass or more, poly(5-sulfoisothianaphthene-1,3-diyl-co-isothianaphthene-1,3-diyl) or a salt thereof.
